

Korea Meteorological Administration Net Zero National Meteorological Center International Invited Design Competition

This design competition aims to build a new work space for main and support departments due to the relocation of the Korea Meteorological Administration headquarters to Daejeon City. At the same time, considering the symbolism and future value of the Korea Meteorological Administration, which monitors weather and climate change at the forefront in the era of climate crisis, we aim to build a truly world-class "Carbon Neutral(Net Zero) National Meteorological Center."

The Korea Meteorological Administration announces the 'Korea Meteorological Administration Net Zero National Meteorological Center International Invited Design Competition' as follows.

2024. 01. 15

Administrator, Korea Meteorological Administration
